2. Job Fair:

The job fair was a success, with 8 students receiving job offers after the final interviews. There is a recognized need for more job fairs targeting different streams. It has been decided to organize an additional round of the job fair, either by the end of April or mid-May, to provide more opportunities for students.

3. Science and Women's Day Celebrations:

- **Science Day:** This year, the Science Day celebrations were conducted with great enthusiasm, fostering a spirit of scientific inquiry among students.

All students actively participated in a variety of outdoor games, including badminton, volleyball, kho-kho, kabaddi, race, and shot put, contributing to the vibrant atmosphere and fostering teamwork and sportsmanship.

5. Review of Semester-End Exam Results (Odd Semester):

The students performed exceptionally well in the final exams. For those who achieved less than 50 percent, their mentors provided counselling sessions to address the challenges they faced. Actions will be taken to help these students improve their performance in future assessments.

6. Preparation for the National Seminar scheduled on 27th and 28th March, 2025:

Regular assessments will be conducted to track their progress and identify areas for improvement. Remedial classes will be scheduled to address difficult topics and reinforce learning. Encouragement and positive feedback will be given to boost the learners' confidence and motivation.

Advanced learners will be offered research projects and specialized workshops. Tasks that require critical thinking will be assigned to deepen their understanding. Encouraging independent study to explore topics beyond the syllabus. Leadership roles, like mentoring peers, will be offered to develop skills. Opportunities for applying knowledge through case studies or internships will be provided. Advanced learners will be allowed to progress faster through the curriculum.

9. Other Issues Discussed with the Permission of Chair

- I. The 3D models created by the B.Ed. and B.F.A. faculty should be organized in a way that allows easy access and display for other students. This will help attract the attention of other candidates. The faculty has recommended setting up an attic space in the classrooms to store these models for future visualization and display.
- II. The dates for workshops and seminars are being rescheduled and will be updated on the Academic Calendar.
- III. Since teachers are not available to record their lectures daily, it is recommended to record the lectures during class sessions. These recordings will then be uploaded to Google Classroom and the college YouTube portal.
- IV. In response to student requests, teachers have suggested combining sports classes with the lunch break. This would provide all students the opportunity to play together and learn various games.
